# Why Choose Maximo

Used by leading organisations around the world, IBM Maximo has been consistently rated by Gartner and ARC as the market leader in Asset Management solutions.

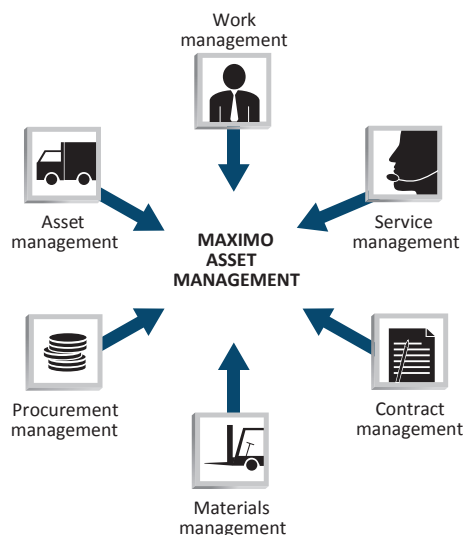

Maximo delivers a comprehensive view of all asset types - production, facilities, transportation and IT - across your entire enterprise. This holistic perspective allows you to manage all of your assets from a single platform.

Maximo allows you to develop comprehensive programs for preventive and predictive works, and reduce unplanned maintenance. Together, these programs can reduce costs and increase asset uptime, leading to combined performance improvements.

## Key Features

- Strategic Asset Management Planning
- Works Management
- Procurement
- Inventory Management
- Spatial, GIS Integration
- Mobility
- Business Intelligence and Reporting

## IBM Maximo Asset Management

*Realize benefits  
faster and  
improve ROI,  
without costly and  
time-consuming  
implementations*

## Maximo OnDemand (SaaS) – A Game Changer

Maximo OnDemand is a cloud based comprehensive asset management solution to meet the demands of asset-intensive organisations. Maximo OnDemand, can manage all your asset operations and business processes on a secure, hassle-free platform at a fraction of the cost.

Maximo OnDemand (SaaS) enables organizations to benefit from a powerful asset and work management Software as a Service (SaaS) solution.

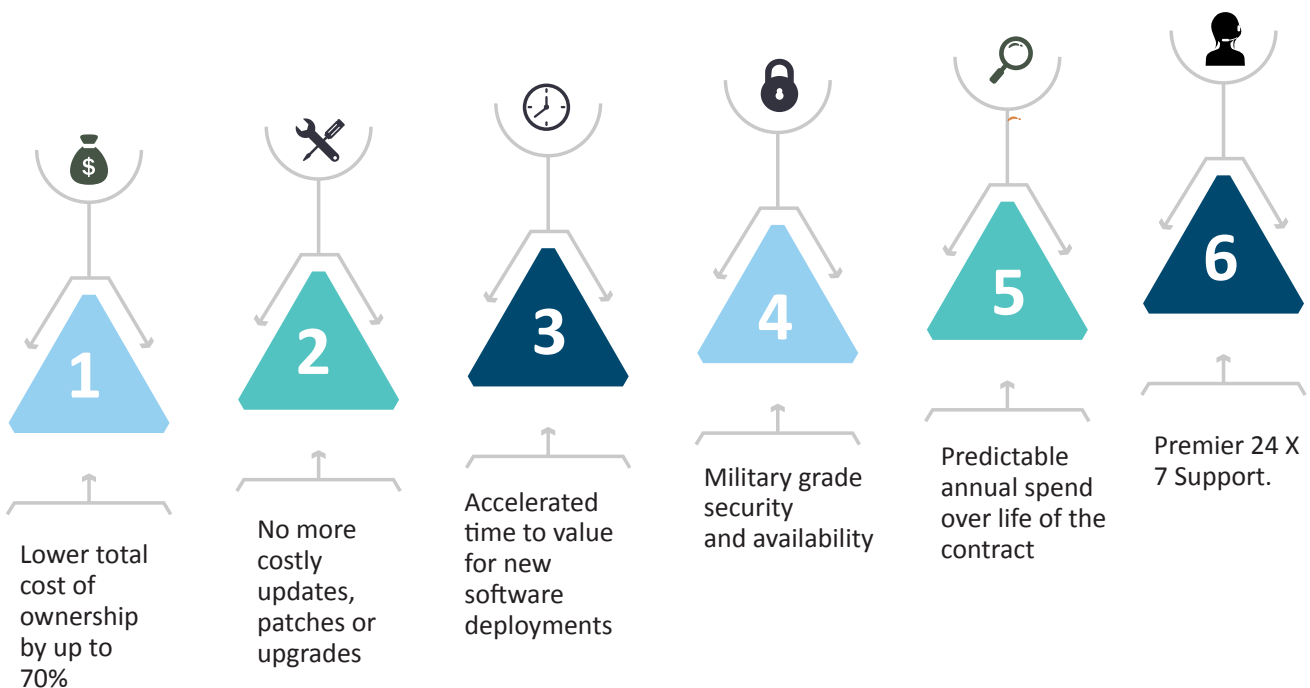

### Maximo OnDemand includes:

- Full capabilities of Maximo available as a subscription based delivery model
- Includes Maximo Everyplace for mobile users free
- Hosted using IBM Softlayer datacentres with 99.8% availability
- Includes systems admin, updates, patches and upgrades
- Includes 24 X 7 Technical support for Sev1 and Email Support for Sev 2-4
- Enables organizations to respond to user requests more readily, ensures a safe and secure work environment, and reduces the risk of asset failure

*No investment required to buy or maintain costly IT “Infrastructure”*

## Benefits of Maximo OnDemand (SaaS)

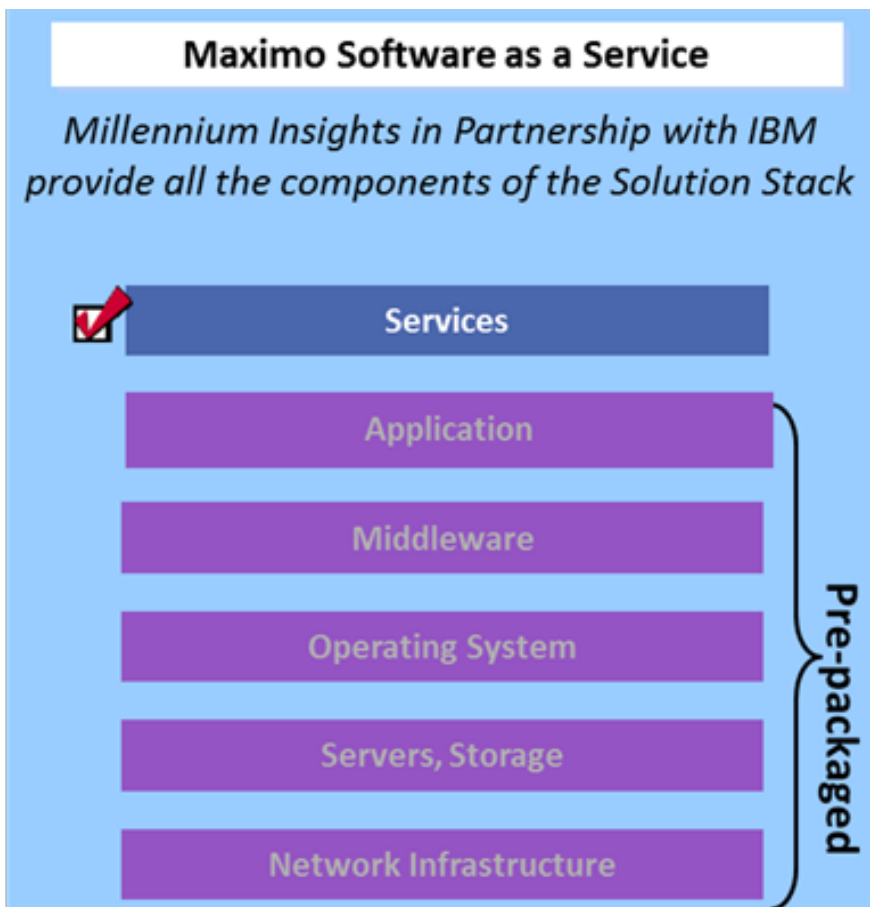

## Why Choose Millennium Insights

Millennium Insights is a Certified IBM Business Partner with over 20 years' experience in helping clients maximise the value they receive from Maximo. We focus on 4 key areas

1. Understanding the strategic asset management objectives of our client
2. Aligning the technology to these objectives
3. Developing a comprehensive information management model
4. Implementing best practice business processes and
5. Enhancing the user experience.

We only select consultants that have industry knowledge coupled with a critical thinking mind-set. Our goal is to help organisations solve problems and achieve their strategic asset management objectives not just implement a software solution. Providing value for money is at the core of our culture. In every client engagement/implementation we ask the same question: Does our client feel we have met or exceeded their expectations?
